CHENG EN HSIEH

Product Manager / Product Owner | AI & ML Products, B2B SaaS, E-commerce

London, UK | Right to work in the UK | chengen.hsieh197@gmail.com | +44 7352 134838 | linkedin.com/in/markhsieh1997 | chennxie.com

PROFILE

Product Manager with 6 years' experience across AI, B2B SaaS and e-commerce. Defines the problem and success criteria first, prioritises the backlog with data, ships the smallest viable solution, and lets results decide what scales. Has worked as the Product Owner for a Scrum team, owning the product vision, backlog, user stories and acceptance criteria.

CORE SKILLS

AI & Data: LLM, Claude Code, Codex, agentic workflow automation, model evaluation, A/B testing, SQL, Google Analytics, SEO.

Product: product vision and strategy, OKRs, roadmapping, discovery, PRDs, user stories and acceptance criteria, product backlog management and refinement, prioritisation, user and market research, prototyping, user experience (UX), go-to-market (GTM), Agile/Scrum, sprint planning and reviews, continuous improvement, stakeholder management, cross-functional leadership.

Tools: Jira, Confluence, Figma, Miro, Notion, Microsoft Office, Google Workspace, LINE Official Account, Slack.

Languages: Mandarin (native), English (fluent).

PROFESSIONAL EXPERIENCE

Product Operations Specialist | Banyan Digital Limited

London, UK | Hybrid | Apr 2026 – Jul 2026 | role made redundant in a company restructure

- Owned product and operational improvements for a content social platform with 127k+ monthly active users across the UK, Americas and Asia, and drove adoption of new internal tools by embedding them in the editorial team's daily workflow.
- Identified manual content production as the primary bottleneck to publishing velocity, then built 5 automated workflows with Claude Code and Codex for content generation (videos, articles, images, covers), task distribution, publishing and data dashboards. Doubled daily output per editor from 5 to 10 pieces at the same headcount.
- Used Google Analytics insights and SEO research to identify content and UX opportunities, optimising website layout, editorial direction and keyword strategy to increase average active-user engagement time from 7 mins to 9 mins 30 secs.

Product Manager / Product Owner | Juksy Digital Media Co., Ltd.

Taipei, Taiwan | Hybrid | Apr 2024 – Aug 2025 | promoted to Product Manager within 9 months

- Took a B2B2C SaaS platform from 0 to 1 as sole PM, framing the commercial problem with the CEO before any spec existed, then scoping v1 against what the business could realistically monetise in year 1 rather than the full feature wish list.
- Ran discovery across finance, engineering, design, sales and pilot customers to turn competing asks into a single prioritised roadmap, then owned the full delivery spec (PRDs, user stories, user flows, acceptance criteria).
- Acted as Product Owner for a cross-functional team of 10: owned the product backlog end to end and ran weekly sprints in Jira, including backlog refinement, sprint reviews, retrospectives, UAT and release notes in Confluence.
- Shipped an MVP to real users to test the market before committing further build, then iterated on live usage data and customer feedback, holding 100% on-time delivery across the roadmap.
- Identified editorial throughput as the core margin constraint and built an AI content pipeline (Google Trends ingestion and an internal model tuned to brand voice), lifting output from 7 to 20+ articles per editor per day with human-in-the-loop review.
- Architected payment-gateway and API integrations across Google Sheets, LINE Official Account, OpenAI and Anthropic, centralising tools behind a single membership system and cutting manual work 80%, from 5 hours a week to 1.

Product Specialist & Domain Expert | Rosetta.ai

Taipei, Taiwan | Hybrid | Feb 2021 – Apr 2024

- Owned the AI recommendation and personalisation product across 3 years in production for 1,000+ merchants, from the data layer through A/B testing to rollout, working with engineering and data science to cut inference response time 43%.
- Reframed the growth question from model accuracy to commercial fit: segmented the client base to find where personalisation actually paid off, then concentrated rollout on merchants with no prior personalisation, a cohort averaging 660% annual revenue growth with the strongest accounts reaching 250% AOV and 350% CVR uplift.
- Built a 10,000+ attribute taxonomy from fashion consumer research. It powered a product recognition model whose accuracy rose from 40% to 90%+ across all categories, and became the labelling layer the recommendation model ranked against.

Project Manager (Freelance, concurrent) *| Taipei, Taiwan | Oct 2020 – Mar 2023*
Procurement Specialist *| MAKALOT | Taipei, Taiwan | Mar 2020 – Aug 2020*

SIDE PROJECTS

Credit-card rewards search (fintech side project): live tool that ranks 30+ cards on net reward after FX fees, caps and registration rules, and picks the right card for a given spend. Sole build and operations.

Daily Brief: Telegram bot where each reader sets topics and volume and gets a daily briefing they can retune at any time. Split the pipeline into shared research plus a per-reader write-up so cost stays flat as readers grow.

Travel Radar: searches split-ticket combinations across a date window to lower fares and add stopover cities to the same trip.

EDUCATION

BA Fashion Marketing, Fu Jen Catholic University, Taiwan *| Sep 2015 – Jun 2019*
